DARE TO DREAM

DREAM OF THE POSSIBILITIES

Imagine a world where technology simplifies your life. Where it protects you, entertains you, keeps you comfortable and gives you more free time for the things that really matter.

You can make this dream a reality....a world where you can indulge in luxury, with a single touch of a button, where you can adjust temperature and lighting settings to match your mood, select music to play whenever and wherever you want it and where you can enjoy the ultimate home cinema experience, without ever having to leave the house.

Imagine technology that both enhances lifestyle and gives peace of mind.....Crestron makes this dream a reality.

“All our dreams can come true, if we have the courage to pursue them.”

Walt Disney

TOUCH AND EXPERIENCE

CONTROL AT YOUR FINGERTIPS

Total Home Technology from Crestron streamlines and simplifies all the technology in your home to offer you the ultimate lifestyle of comfort and convenience. Crestron's award-winning Total Home Technology solution eliminates the need to walk from room to room to adjust the lighting, temperature, security or audio visual components. Whether from an easy to use touchpanel, remote or customised keypad, total control of all your home automation elements is at your fingertips, wherever you are.

“Not life, but good life,
is to be chiefly valued.”

Socrates

ENJOY YOUR MUSIC

...IN EVERY ROOM

Now, you can enjoy your music, your way. With your family's entire music collection, whether on radio station, CD player, DVD player, MP3 player, Windows Media, Apple iTunes or internet, brought together in a single system and accessible by anyone, anywhere in the house. Where music can be enjoyed both collectively and individually, allowing users to select their own music from any room and listen at the same time, wherever they are.

Crestron is a complete, integrated audio distribution system in a simple to use, easy to install and affordable package.

WATCH IN HIGH DEFINITION

BECAUSE SEEING,
IS BELIEVING

Picture yourself watching not just the content you have, but the content you want, in glorious high-definition.

We can give you access to your entire movie library of Blu-ray discs and DVDs, through one of the most full-featured, high-definition media servers around. Enjoy the benefits of an online catalogue, updated daily, providing immediate access to all the new releases and where exclusive Crestron WorldSearch technology enables you to find additional content from virtually any source, worldwide. Surf the web, check emails or watch a live streaming video of breaking news or your favourite sports team in true HD. Crestron revolutionises the way you experience high-definition content, removing all boundaries between TV, movies, music and Internet and making it the only solution for the digital age.

LIVE IN COMFORT

FEEL AT HOME

Experience total peace of mind in a home where you can monitor and control your lighting, heating and air-conditioning systems to improve the comfort and quality of your environment. Where you can control multiple zones, from any location and easily pre-set temperature set points. A system which allows you to optimise energy efficiency by automatically adjusting the temperature according to your lifestyle and control it remotely, for your added convenience. Arriving home early? Simply use your laptop or iPhone to adjust the temperature to ensure that a warm welcome awaits you. You can even monitor the wine cooler or the jacuzzi temperature!

Schedule curtains and blinds to slowly rise to gently wake you in the morning, then close again at sundown for privacy and to reduce light pollution. Use daylight harvesting to illuminate a room efficiently, using electrical light only when necessary.

Intelligent Crestron control manages all environmental and home systems to achieve maximum energy savings without compromising comfort or convenience.

SAVE YOUR ENERGY

SET THE RIGHT AMBIENCE

Setting the perfect scene throughout your home and at the same time saving energy, that's what Crestron delivers. We give you the power to use energy when you want to. Simple one-touch dimming of individual lights and groups of lights puts you in absolute control.

Set the precise lighting scene for watching movies or reading in bed, or creating just the right ambience for an intimate dinner or hosting a party, all while saving energy and money.

When turning your lights "ON" you can pre-set the maximum level to 90%, still bright enough but saving you money. And of course, kids always leave the room without turning off the lights. Intelligent automation features, such as built-in motion detection, takes care of this for you and automatically turns lights on only when a room is occupied, and can schedule lights to turn off when the family leaves the house in the morning.

FEEL SAFE

RELAX IN YOUR HOME

Feel safe with the support of your Crestron system, linked throughout your property. From the automation of entrance gates to audio and video intercom solutions providing you with the ultimate in security and communications.

When listening to your favourite music or watching a DVD, you will know the instant someone enters the driveway or rings the doorbell. The audio is gently muted, a camera picture appears on your touchpanel or television, and you can speak with the visitor and grant access to your home at the push of a button.

And if you are away from home, Crestron allows remote access through your PC or PDA device enabling you to check on the security of your home while you are away on business or holiday.

YOUR STYLE, YOUR WAY

IMAGINE THE POSSIBILITIES

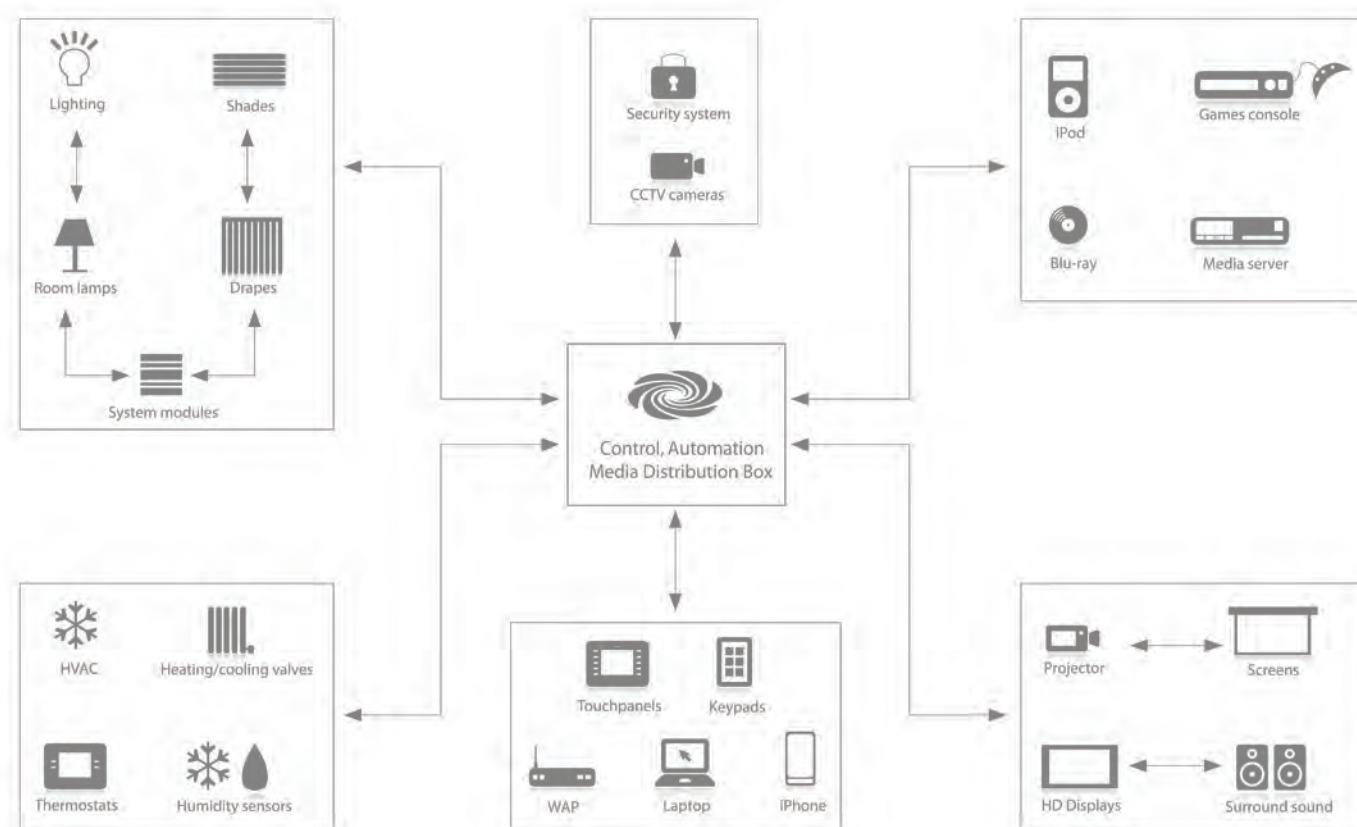

Crestron connects people with technology. Our touchpanels, keypads, and handheld remotes are how everyone interacts with and experiences all your integrated entertainment, communication and control systems.

Crestron offers more than 100 models to choose from, and in a wide choice of finishes. Crestron delivers the only touchpanels with embedded PCs, HD video display and enhanced wireless communication. From handheld to wall mount to tabletop designs, from sleek edge-to-edge glass veneer to architectural series faceplates, there's a Crestron touchpanel in every size, for every room and every budget.

INNOVATIVE SOLUTIONS

TOTAL HOME CONTROL

TOUCHPANELS AND HANDHELD REMOTES

The broadest range of touchpanels. With dozens of models to choose from, we offer distinctive touchpanels for every room in the home.

ENVIRONMENTAL CONTROL

Crestron Green Light™ consists of lighting, shade and climate control solutions working in harmony to provide comfort, convenience and savings. Energy and cost savings are optimised when environmental systems are intelligently working together and centrally controlled.

KEYPADS

Simple yet powerful home control interfaces to control lights, thermostats, shades, security, entertainment and more. Crestron keypads are available in a variety of configurations, colours and finishes to complement any lifestyle or decor.

CONTROL SYSTEMS

The "brain" of the Crestron home manages audio, video, lighting, security, thermostats and shades, integrating them all on a managed network. All Crestron connected devices are accessible from every room in the house and remotely from computers, laptops and the iPhone.

ENTERTAINMENT CONTROL

Bring all your home entertainment together into a single integrated solution and distribute content throughout the home. Select, control and play any traditional or digital HD source - even Blu-ray and Internet streaming media - in every room.

FACEPLATES

Crestron Designer, Decorator and Cameo™ Series of keypads are available in a variety of configurations, colours and finishes to complement any home interior.

INTEGRATION SOLUTIONS

Whether you're distributing iPod content on the home network, controlling systems remotely from a Mac, PC or iPhone, or turning a plasma into an HD touchpanel with cool Flash animations, Crestron provides seamless solutions.

For more information visit crestron.eu or contact your local authorised Crestron dealer.

Crestron technology can incorporate an impressive array of applications for the home.
