

LightSource™  
by Crestron

# Sunrise

## At First Light

Crestron LightSource includes a complete selection of keypads and control panels in a variety of configurations, designer finishes and colors.

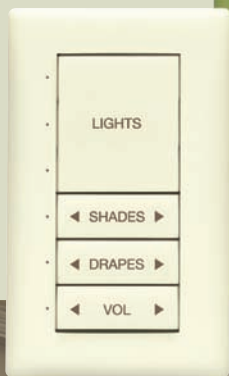

Whether you're up before dawn or lucky enough to sleep in, setting the right mood first thing in the morning can be as easy as pushing a button. Imagine beginning each day in full control of your surroundings even before the coffee finishes brewing. **LightSource by Crestron** puts complete control of your environment right at your fingertips.

Each **LightSource** component is part of a family — an integrated group of dimmers, switches and cabinets that give the homeowner a customized, reliable system that's easy to use.

**LightSource by Crestron. Everything but the Sun.**

Lighting, climate  
control, security,  
access control,  
irrigation, window  
treatments, pool and  
spa, AV, and other  
systems integrate  
seamlessly with  
LightSource  
by Crestron.

Change a room's entire ambience with one button press. Instantly adjust the drapes to reduce glare and protect your artwork and furniture during the day or schedule landscape lighting to automatically turn on at dusk.

Every **LightSource** installation provides custom, streamlined control and automation of complex system functions with the added benefit of helping to save energy and make use of a room's natural light.

**LightSource** eliminates the need to walk from room to room to adjust lighting, drapes, AV, even temperature. Simply select the perfect setting for each room throughout the house right from any keypad or touchpanel.

When the final ray of natural light fades, **LightSource** puts you in charge. A simple press of a Crestron keypad, dimmer or touchpanel screen brings the lights up to where you like them, in any room of the house.

Whether it's time for a family dinner, a big weekend party or a quiet night with someone special, **LightSource** lets you set the mood with customized, pre-programmed lighting scenes for any occasion. Pressing the "Romance" button on your touchpanel not only perfectly dims the lights, it can also warm the Jacuzzi and automatically cue the music or the DVD of your favorite date movie.

The ability to dim your lights can cut electricity usage, and extend the life of bulbs resulting in energy savings. Crestron dimmers and switches offer a perfect solution for new constructions and retrofits.

# Sundown

When Night Falls

All Through the Night

# Moonlight

Whether you're working on the computer, curled up in bed with a good book, or watching television, **LightSource** brings versatility, comfort and convenience to your fingertips. Opt for one of our touchpanels with video support which allows you to look in on the baby's room or even see who's at the front door.

And just as easily as **LightSource** can set the right scene for rest and relaxation, a touch of a button can also bring comfort and security. Simply press a button labeled "ALL ON" to flood your home and landscaping with light. Rest easy with LightSource in command.

As part of a complete Crestron control system, just one touch of a button can activate a sequence of functions that simplify complex tasks.

**Architectural Series Keypads** bring a contemporary shaped-design to traditionally flat faceplates. They are available in a wide selection of finishes and offer extra large backlit buttons for custom engraving. They also play door chimes, voice prompts, button clicks and other audible feedback.

## Wireless and Handheld Remotes

5.7" SmarTouch RF Wireless and Wired Touchpanel

3.8" MiniTouch Handheld Touchpanel

MiniLCD RF Wireless Remote

Waterproof RF Wireless Remote

## Isys® Touchpanels

When Crestron introduced the world's first touchpanel-based control system, home automation was redefined forever. That spirit of innovation has never ceased and today Crestron offers the most advanced and comprehensive line of touchpanels available.

Crestron touchpanels combine modern styling and cutting-edge technology with the ingenuity and sensibility that only comes with 35 years of experience.

Isys® brand touchpanels are custom programmed to meet the discerning needs of its users. Each touchpanel screen begins as a blank canvas for the creation of personalized control screens that can be designed for the most basic or complex systems, affording pure "one-touch" control and complete command over every possible function.

Touchpanels do away with piles of remote controls, cryptic front panels, and cluttered wall switches, putting a friendly face on all of the technology in today's modern homes.

## Dimmers and Switches

Available Finishes

Black

White

Almond

**Dimmers and switches** let you fine tune lighting to create the perfect scene. Crestron **thermostats** complete the **LightSource** offering to keep things comfortable.

## Just Your Style

**LightSource** by Crestron offers a host of personalization options designed to meet your discriminating taste. Choose from a variety of finishes to match your décor and customize the engraving on keypad buttons throughout your home.

## HVAC and Humidity

Almond

## Architectural Lighting Enclosures

All Crestron dimming and control modules mount efficiently in Crestron's custom enclosures, making installation and storage easy and neat. While touchpanels and keypads grace the living spaces of the home, Crestron components do the work while tucked discreetly inside Automation Enclosures in the control room.

## Custom Programming

Crestron **LightSource** makes system design easy for your programmer, too. **D3 Pro Lighting Software** allow the programmer to create custom solutions unique to each home. They can even set an astronomical clock to trigger actions based on the time or day or sunrise/sunset.

# Cameo™ Keypads

## Step 1

Select Mounting Style

Cameo Flush Mounting

Cameo Standard Mounting  
(\*Black, White and Almond only)

## Step 2

Select Cameo Color

Butter Cream Smoke Stone Mustard Ecu Wheat Wine Olive Brick

## Step 3

Configure your Cameo with supplied buttons and blanks

## Lighting and Shade Control

## Wireless Dimmers

## Design Your Cameo in 3 Easy Steps.

Cameo Keypads answer the need for a diverse selection of designer colors, and goes a step farther by dramatically reducing the standard keypad wall plate size without comprising button size.

### Choose Your Mounting

Mounting options include a choice of standard installation in a Decora® style faceplate or using Crestron's exclusive flush-mounting system.\*

### Choose Your Color

Cameo is offered in 10 designer colors, plus 3 standard colors.

### Configuration Options

A complete set of buttons and blanks in three sizes is included. The installer can customize and configure up to six buttons for 18 functions in total.

## iLUX™ Integrated Lighting System

Controls six lighting zones and six groups of shades with a single wall mount panel that replaces the litany of switches and dimmers on the wall. No need to search for the right switch plate or the right combination of light settings. Call up a variety of lighting scenes with a simple button press. Available in Almond, White and Black.

## infiNET™ Wireless Technology

The first lighting dimmers to operate on Crestron's exclusive infiNET™ wireless mesh network, eliminating the need for physical control wiring. Instead of opening walls and pulling wire for retrofit installations, infiNET enables wireless control of various subsystems such as lighting and HVAC.
