

# The Kaleidescape System

The Ultimate Entertainment Experience

kaleidescape™

### Presenting the Kaleidescape System

It's been called the Best of the Best by Robb Report. Others have described it as a one-of-a-kind entertainment experience. It's been identified as one of the hottest trends in home entertainment. It's the Kaleidescape System—the award-winning entertainment server that delivers movie and music experiences that are more exciting and compelling than ever before.

The Kaleidescape System will simplify the way you collect, manage and enjoy your movies and music. You'll say goodbye to the clutter of all those DVDs and CDs, and to the frustration of having to organize them over and over. You will be able to reclaim the valuable space used to store all those discs because your DVDs, CDs, and home movies will be readily accessible on your Kaleidescape System's fail-safe hard disks.

The Kaleidescape System can deliver movies and music instantly to any room. And because the Kaleidescape Interface is well-designed, simple and intuitive, your family and guests can enjoy your movies and music at any time.

## Music. Movies. The Kaleidescape Experience.

Reclaim precious cabinet and shelf space throughout your home once your DVDs and CDs are loaded into your Kaleidescape System.

“...it's unrivaled in its role as a house-wide entertainment machine.”

*Sound & Vision™ Magazine* February/March 2004

## Elegant and Compelling

The extraordinary Kaleidescape Interface is simply the best. It provides the easiest and most entertaining way for you to re-connect with your treasured movies and music.

To add a movie or album, simply place the disc into the DVD reader in a Kaleidescape Movie Player or Music Player, and its contents will be imported and cataloged automatically. Using Kaleidescape's exclusive Movie and Music Guide Services, your Kaleidescape System obtains information about each item, including high-resolution cover art, a synopsis or review, artist details, year of release, running time, and other information. After importing your DVDs and CDs into your Kaleidescape System, you never have to touch them again.

As your collection grows, storage can be added by inserting more disk cartridges or by adding more Kaleidescape Servers to provide all the capacity you need. Even if you have thousands of DVDs, CDs and home movies, the Kaleidescape System lets you effortlessly select and enjoy any movie, album or song you own. Instantly.

### Command Performance

Once your collection has been imported into your Kaleidescape System, the first thing you'll notice is that everything happens immediately. No searching for DVDs or CDs, no fumbling with cases. No waiting for a mechanical changer. As you browse, your movies and albums appear onscreen – instantly.

Once you've made your selection, you simply press PLAY, sit back and enjoy.

When you play a movie, there are no DVD menus, no trailers, no advertisements. Kaleidescape's Movie Guide Service provides patent-pending video bookmarks so you can instantly start a movie, jump to an episode of a television series, or play a favorite scene. You can personalize your viewing experience by creating your own favorite scenes, and even linking them together to create a video collage.

In the mood for some music? A little Soft Rock or Traditional Country, or perhaps some Norah Jones. Just select the genre or the artist and press PLAY. You can also select the albums or songs you wish to hear, and quickly create your own Mix Album. While you're listening, you can explore the reviews of albums and artists provided by Kaleidescape's Music Guide Service.

The Kaleidescape experience comes without compromises. All of your content is imported into your Kaleidescape System at the highest quality possible, with no compression, so your viewing and listening experience is exactly as the artists intended.

### In Control

The Kaleidescape System is compatible with your favorite control system. Whether you prefer a sophisticated touch screen, a simple IR remote, or a web-enabled device, the award-winning Kaleidescape Interface allows you to effortlessly manage and enjoy your entertainment collection. Even small children enjoy finding and starting their own movies and music!

The Kaleidescape System also provides a number of automation cues that can be used by advanced control systems, from manufacturers like Crestron and AMX, to automatically control lighting, set screen masking, move curtains, and make all the audio and video playback choices to optimize your entertainment experience. It's like having your very own projectionist!

We even provide parental controls so you can rest assured that your children are not watching inappropriate movies.

Kaleidescape provides touch panel designs for easy control of your Kaleidescape System.

### The Extras

Kaleidescape's DVD Collections, Custom Introductions and High Definition content will help you get the most out of your Kaleidescape System.

#### DVD Collections

Kaleidescape has made it easy for anyone to own the very best movies and capture the excitement, glamour and drama that motion pictures can deliver.

Each DVD collection is designed to help you build an impressive movie library. For example, Kaleidescape's Critics 150 includes arguably the best movies of all time. Kaleidescape also offers a Family Collection that has popular movies, perfect for young and old alike. And you can explore undiscovered cinema with *The New York Times Best DVDs You've Never Seen, Just Missed or Almost Forgotten Collection*.

#### Custom Introductions

Kaleidescape Custom Introductions can turn an ordinary movie night into an authentic theatrical experience right in your own home! This package provides you with six different openings personalized just for you, and a movie trivia sequence. Combine these with Kaleidescape's scripting capabilities for an even better experience.

#### High Definition Entertainment

The Kaleidescape System is the perfect platform for showcasing true High Definition content. And we ship two groundbreaking wildlife films with each Kaleidescape System. *Kalahari—The Great Thirstland* and *Kalahari—The Flooded Desert* are breathtakingly photographed by pioneering filmmaker Tim Liversedge.
