

Luxaflex®

Conservatory Blinds Collection

Luxaflex®

“ It’s been a great benefit having Luxaflex® blinds in our conservatory. We’ve kept cooler and our plants have flourished ”

MRS PINNER CHESHIRE

Conservatory Blinds

The Luxaflex® Advantage – Made to Measure Personally For You

When you buy Luxaflex Blinds, you are buying 50 years of experience in providing customers with the highest possible standards of service, fitting and after sales support.

Using high performance materials in manufacturing made to measure products to exact requirements, quality permeates every aspect of our service, from design and manufacture to delivery and installation and all with a free 5 year guarantee. An extensive and qualified dealer network, trained by Luxaflex to provide you with the answers to all your questions and offer advice, also provide customer specific measuring and installation services.

Our web site www.luxaflex.com, also contains information on products, trends, maintenance tips and local retailers in your area.

Styles To Suit - Every Type Of Conservatory

A conservatory is an attractive way to extend your home, serving as a light and airy link in style between house and garden. To soften the sunlight, control the temperature, protect the furniture and plants and provide privacy whilst creating an inviting and comfortable atmosphere for relaxing and entertaining, blinds are an essential requirement. They help keep your conservatory cool by reflecting heat and reducing glare in summer whilst maintaining warmth and comfort in winter and giving your conservatory an air of elegance.

Whatever the style of your conservatory, modern lean-to, elegant Edwardian, traditional Victorian or maybe something a little more contemporary, Luxaflex has the perfect solution.

Luxaflex Conservatory Blinds - Perfect From Every Angle

The Luxaflex Conservatory Blinds collection contains a wide range of fabrics styles and colours all designed to provide you with the very best in sun protection. Choose from Duette®, Duette® Fixé, Plissé, and a wide variety of side window blind styles that include venetian blinds, vertical blinds and Silhouette® Shades.

Duetto®

“ Having a south facing garden, the heat and glare in our conservatory was unbearable before we had the blinds fitted ”

MR ADAMS SURREY

Cellular Shades

Luxaflex® custom make blinds for both roof and side windows whatever your style of conservatory.

A wide range of colour and fabric types are available to compliment your interior. They are easy to operate, either manually with cords, handle or crankrod, or electrically via a switch or hand held remote control.

Duette

Duette honeycomb pleated blinds offer the best heat management performance available. Ultra light weight and seam free, Duette is easy to clean and can be tailor made to fit even the most difficult shaped roof windows.

- Superior insulation because of honeycomb structure
- Cords run invisibly through the blind
- Two transparencies available: opaque and blackout
- Stable and strong construction of fabric
- Duo Tone fabrics are white on the reverse offering high reflection and uniform look from the outside

Wire passes through the cells of the fabric, when blinds are closed. There are no unsightly visible cords or holes.

The insulating honeycomb cellular structure of Luxaflex® Duette® provides a barrier that keeps heat out in Summer, and warmth inside in Winter

Duette Fixé

Duette Fixé offers all the benefits of standard Duette blinds with a unique flat back cell structure which means the fabric falls in a regular pleat at the front of the blind, creating a beautifully uniform appearance from top to bottom.

- Regular pattern of pleats from top to bottom of the blind.
- Modern look with 32mm cell size
- Asymmetrical cell stabilises the stretch of the fabric

Regular pleating at the front of the blind with a beautiful and simple flat look at the back allows Luxaflex® Duette® Fixé blinds to sit perfectly within the window frame.

Plissé

“ In the winter time the blinds keep the conservatory warmer, which means we've been able to entertain in the conservatory which we didn't do before ”

MR HAYNES NORTH WALES

Single Pleat Shades

Plissé

Plissé pleated blinds offer a practical, modern style which suits any type of conservatory. With 20mm pleats they can be fitted within standard glazing bars to give a neat, flush finish to any style window. Available in a wide range of colours and fabrics types.

- Various transparencies of cloth
- Small stack size when lifted
- 20mm pleat fits inside glazing bars
- Wide selection of fire retardant fabrics
- 3 unique fabric treatments available:

TOPAR^{plus}, *Dust-Block[™]* and *SanaPlus*

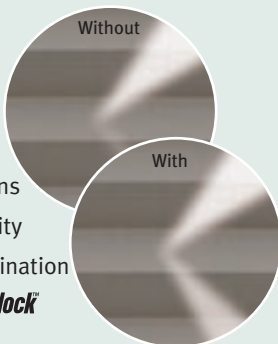

3 Unique Fabric Treatments

Advanced fabric technology does not come at the expense of style. Luxaflex® Conservatory blinds are available with 3 new fabric treatments offering solar reflection, dirt and moisture repellancy and antibacterial properties.

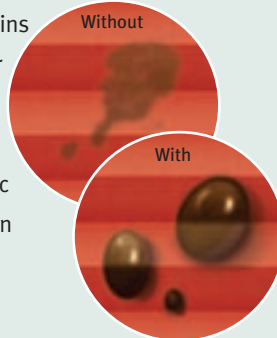

TOPAR^{plus}

- Optimal light and heat control
- High solar and light reflection
- Dust repellent and washable
- Resistant to soiling caused by insects and cleaning agents
- Beautiful from the inside and outside
- Available in all transparencies and colourful designs
- Low heat permeability
- *TOPAR^{plus}*: a combination of *TOPAR[®]* and *Dust-Block[™]*

Dust-Block[™]

- Protects against dry dirt, i.e. dust and smoke particles
- Resistant to water and oil based liquids such as coffee, wine, milk and ketchup
- The coating remains undamaged after cleaning and works on both sides of the fabric
- Expanded lifespan of the product
- Washable fabrics

SanaPlus

- Perfect antibacterial properties (SN 195920)
- Antibacterial properties maintained after several washes
- Perfectly suitable for use in medical care centres
- Fire retardant fabrics available
- Washable fabrics
- Soft fabric handle

Side Window

In addition to Duette®, Duette® Fixé, and Plissé, Luxaflex® offer an array of other blind options for your side windows.

Venetian Blinds

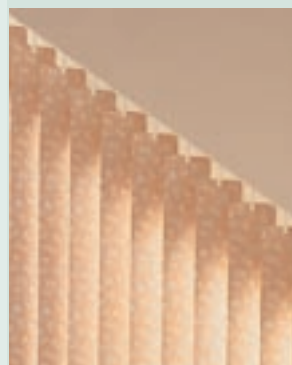

Take a look at Luxaflex® Venetian blinds and you will find some surprising discoveries. Traditionally known for its massive colour palette the venetian collection can provide a wide range of decorative styles. Pastel shades for peace and tranquillity and techno retro tints for a more modern look.

Luxaflex Wooden Venetian blinds are the finest available on the market. Precision-crafted and finished to exacting standards. Each slat is specially selected for the best in grain and colour uniformity, kiln dried and stained or painted to a perfect finish. Optional remote control and full electric operation can make life easier too, in a world where the blind does the moving and you don't. Venetian blinds are available as perimeter blinds only.

Vertical Blinds

Luxaflex® Vertical blinds offer the popular style for conservatories with an added slant. Totally practical and tough, vertical blinds have been the perfect solution for patio and perimeter windows for many years.

As an alternative to the traditional fabric slats, 'Luxaflex' blinds have created a range of aluminium vertical slats with varying options and effects from perforated to super slim 50mm, a fantastic change to the standard vertical blind.

With the clever Luxaflex® sloping headrail system these beautiful vertical blinds will fit into the shape of your conservatory.

Blind options

Silhouette® Blinds

For the softest, most sheer window blind ever, Luxaflex® have created Silhouette® Shades. Soft fabric slats are suspended between voile facings that allow a beautifully gentle light to filter into the room.

The blind cuts out 90% of the harmful ultraviolet light that can cause damage to furnishings. Only available for perimeter windows, Silhouette combines perfectly with Duette® for roof blinds.

Roller Blinds

Combine effective shading with the widest collection of fabrics, and the result has to be Luxaflex® Roller blinds.

Choose from a range of simple cotton and polyester fabrics that provide much needed shade, to the latest in energy saving fabrics that give the best possible heat and glare reflection.

Control the light from the comfort of your armchair with an optional full electric remote control.

Fabric Performance

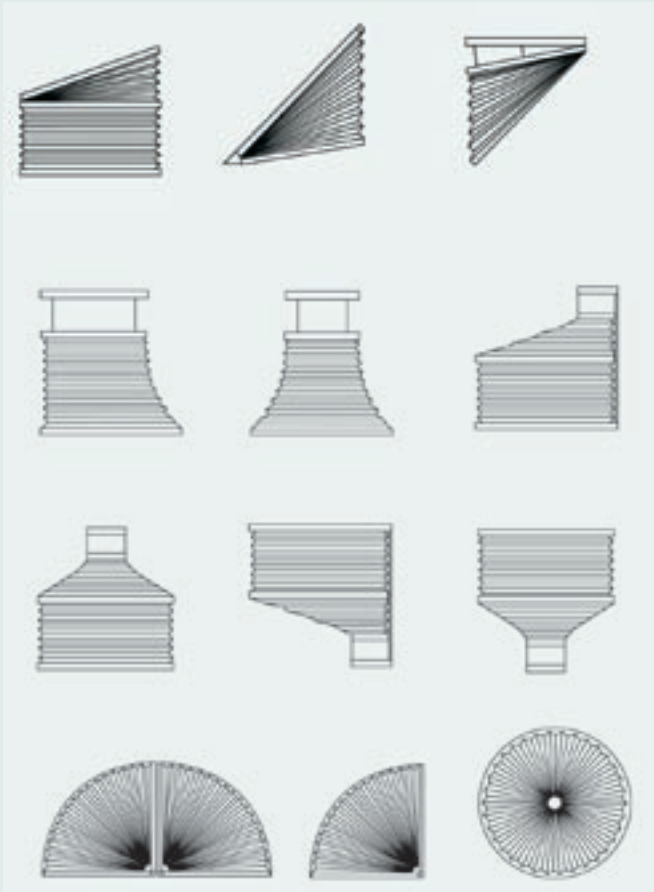

Choosing the right blinds to suit your requirements is an important decision. Whether its cooling, shading, insulation or privacy that is most important to you, find the answers to your needs by referring to the performance table below. Depending on the way you use your room you can be confident that the blinds you choose will perform as well as they look.
