

SMART Board interactive display

A powerful visual tool

The SMART Board™ interactive display is an interactive overlay that attaches to your plasma or LCD flat-panel display, giving it whiteboarding capability. It blends interactivity with brilliant visuals, which makes it perfect for presenting and collaborating.

The touch-sensitive screen enables you to use your finger to move through presentations, navigate websites or control computer applications. Then you can save all your work to print, e-mail or post it online.

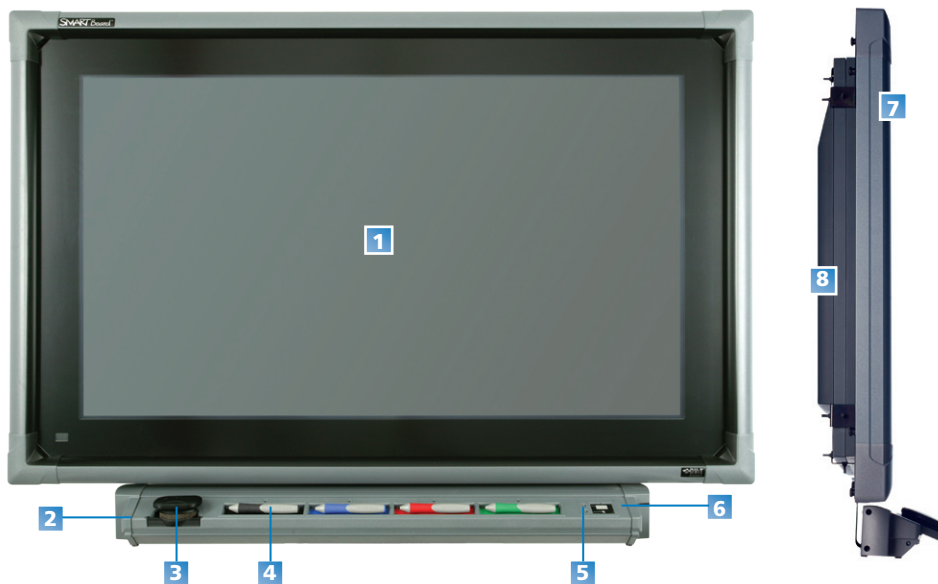

Ideal for writing notes over videos and graphs, this interactive tool is a powerful and sophisticated addition to your meeting spaces.

Fit for your flat-panel display

Compatible with a broad range of flat-panel display sizes and brands, SMART Board interactive displays use DViT™ (Digital Vision Touch) technology to ensure precision touch without compromising image quality. The anti-glare surface also protects your panel. To attach the interactive overlay to your flat-panel display, use the secure mounting brackets that are provided.

Supported flat-panel displays

SMART Board interactive displays are available for a wide range of plasma and LCD panels. For an up-to-date list, visit www.smarttech.com/corp.

Components

- 1 Touch surface
- 2 SMART Pen Tray
- 3 Eraser
- 4 Pens
- 5 On-Screen Keyboard button
- 6 Display panel
- 7 Right mouse button
- 8 Interactive overlay

Key features

- **Touch system** – Write, erase and perform mouse functions with your finger – without special tools or a reduction in image quality. DVIT is the magic behind SMART's proprietary digital touch system.
- **SMART Pen Tray** – Pick up a pen or the eraser, and the pen tray automatically detects which tools you've selected. Buttons activate the On-Screen Keyboard, right-click and help functions.
- **Digital ink** – Write in digital ink over applications, websites and videos.
- **Save function** – Instantly save and capture notes.
- **Display Control Strip*** (install optional) – Control your display settings from the display.
 - Sleep Mode icon blanks the screen to reduce image burn-in
 - Input Source Select icon enables selection of video and image options
 - Display Mode icon enables selection of screen-width options
 - Panel Control Menu icon accesses panel remote-control options
- **Protective surface** – Reduce glare and protect your display with a touch-sensitive surface.
- **Mounting brackets** – Attach the overlay securely to your display with the brackets provided.

*Windows operating system only
