

**DESIGNED TO COMPLEMENT  
THE SIGHTS AND SOUNDS OF THE SEA**

**LINN**

“Today's superyacht combines everything that is modern, exciting and inspiring with the power and endurance to survive at sea.

As the supreme manifestation of personal achievement, and the ultimate blend of technology and artistic expression of our era, superyacht design merits the attention of the world's richest, most powerful and creative people.

These towering expressions of individual accomplishment justify the inclusion of only the most communicative and inspirational music and entertainment systems, because quality sound is essential to stimulate the imagination.”

Ivor Tiefenbrun MBE  
Managing Director

# SOUND MATTERS WHEREVER YOU GO

The benefits of music are understood and appreciated throughout the world. The more accurately a music or theatre system reproduces sound, the more of the performance is communicated and the greater the therapeutic benefit delivered. Whether you are immersed in listening to a CD at home or captivated watching an entertaining movie a thousand miles offshore, the same principle holds true. That's why all Linn products are precision engineered to perform flawlessly even in the harsh environment at sea.

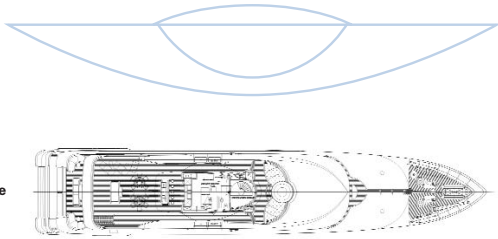

Just as the sea moves a yacht, sound waves carry emotion. They can thrill you, relax you, lift your spirits, or lull you to sleep. The unique pure sound of Linn is the most accurate sound possible, delivering the most involving music, and the most absorbing cinema. Linn's robust and reliable entertainment systems are designed to supply fine music and thrilling movies for the most demanding of ocean-going applications, and operate on the world's finest vessels.

**The SONDEK CD12+ establishes a new standard for CD sound quality at sea. Its discreet, sleek appearance complements the world's most elegant yachts.**

**Linn products combine ageless style and simple beauty with the technology of the future.**

## **‘CLYDE BUILT’ HERITAGE, ENGINEERING EXCELLENCE**

More than 30 years ago, Linn was founded with a clear purpose; to reproduce, through superior sound, the thrills and emotion of a live performance. Linn and its range of products has grown because this commitment to quality and accurate performance has remained constant.

At Linn’s factory in Glasgow, Scotland, specialist engineers and craftsmen design and build exceptional products and total entertainment systems that are ‘simply better’. Precision engineering, attention to detail and a keen understanding of customer needs shape every component, from the most complex multi-media solution to the most discreet music system.

Today, Linn is recognised as the world-leader in pitch-accurate sound reproduction, and Linn entertainment systems can be found throughout the world in royal residences, luxury homes, performance motorcars and the world’s finest superyachts.

**Our partnership with  
Aston Martin Lagonda  
began with the Linn  
entertainment system  
for the Vanquish V12.**

**Linn’s first product, the SONDEK LP12\*,  
is regarded as the world’s ‘most important  
hi-fi component ever’ and is still an  
esteemed member of our product range  
over 30 years later.**

# MADE FOR YOU TO GO TO SEA

Like the vessels they sail on, Linn entertainment systems epitomise a harmony of form and function. Beautiful, crafted exteriors and tactile surfaces house efficient, powerful, precision engineered components which deliver performance that is simply exhilarating.

A Linn music system reproduces every note and subtle nuance of the live performance, enhancing the emotional experience and delivering maximum listening pleasure. A Linn theatre system will make your favourite movie come alive in ways you can't imagine, delivering pictures and sound that will truly move you.

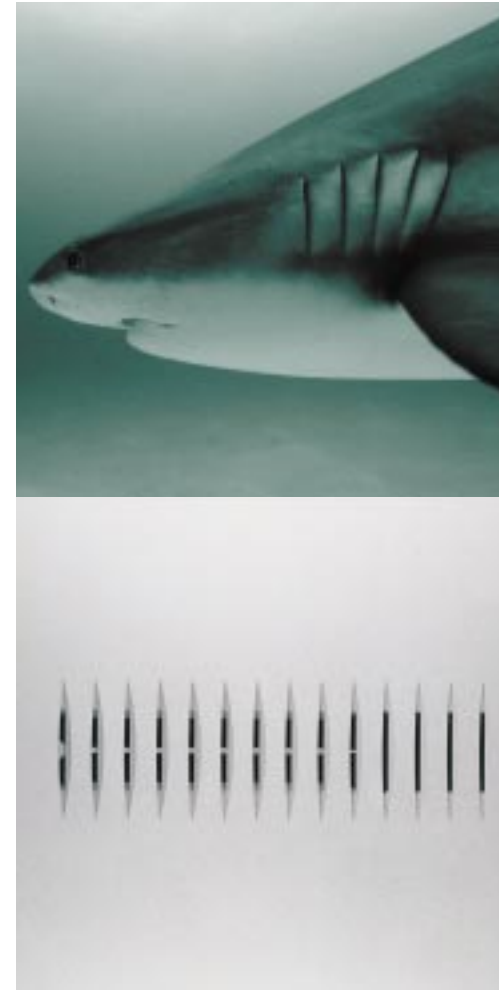

The individual design of a Linn system will depend entirely on your needs. From a stand-alone music system to a fully integrated KNEKT\* multi-room theatre installation, Linn marine entertainment systems are as flexible as you want them to be.

**Machined from solid aluminium, the case of the KLIMAX\* amplifier contains the most versatile, efficient and accurate power amplifier ever made.**

# WE CALL IT LIFE

Whether you're bathing on the deck, simply relaxing in the saloon or dining al-fresco, a KNEKT multi-zone system from Linn gives you full access and control over your entertainment system.

With a KNEKT installation, sources can be integrated into one simple-to-control system, allowing sound and vision to be distributed and controlled from stem to stern. CD player, hard-disk music library, home-theatre or satellite TV – in fact up to 16 sources – can be shared and enjoyed via wall-mounted control units, a hand-held remote control, or a touch-screen keypad.

Tailored and installed to the highest standards possible, a KNEKT multi-zone system can also be programmed to integrate seamlessly with other automated systems to control lighting, screens, projectors and more.

## THE LINN EXPERIENCE MAKES EVERY CRUISE MORE MEMORABLE

One thing that remains constant in an ever-changing world is the superior sound of Linn. With a KIVOR\* music library aboard, you can access your entire music collection without handling a single CD. KIVOR gives you the freedom to quickly record and store thousands of hours of pure, uncompressed audio, creating a library of instantly accessible music. Music can be simply downloaded, and the process of recording an entire compact disc takes just over five minutes. Your choice can then be easily accessed by artist, track number or title. Up to sixteen individual tracks can be accessed at the same time from locations throughout the vessel, making the KIVOR the cornerstone of any marine entertainment system installation.

*SY Shenandoah (44m) - Townsend & Downey/McMullen & Wing*

The KIVOR TUNBOKS unit can store enough CD quality music to listen for 7 hours a day on a 6 month voyage without anyone ever having to hear the same track twice.

## PEACE OF MIND, AUTHENTIC VALUE

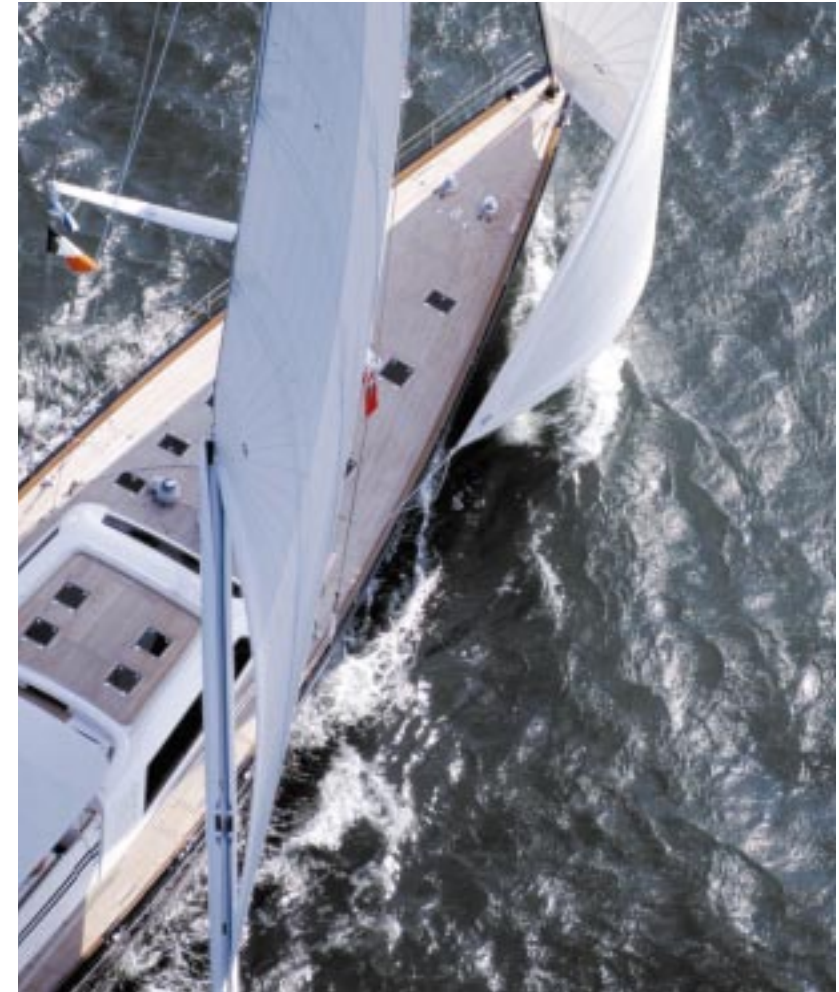

The choice of the system installer and integrator can be the most important decision on a project. As all of our installers have been pre-accredited by Linn, look to us for a trustworthy, reliable partner.

Linn Approved Marine Affiliates are qualified to offer a full design, sales, project management and support service right around the world. These highly skilled Linn trained marine entertainment specialists offer expert support in the Americas, Europe, Australasia, in the Far and Near East, and co-operate across all of the main cruising areas of the world.

A Linn system can adapt to your evolving needs and is built with open, standard interfaces and a versatile infrastructure to accommodate future enhancements. An expert Linn Approved Marine Affiliate will anticipate what your requirement will be from a whole vessel networked system now, and in ten or twenty years.

To cover all eventualities,  
a global network of fully  
trained Linn Approved Marine  
Affiliates co-operate with  
Linn to provide effective  
support and rapid service.

## PROVEN AT SEA, SIMPLY BETTER

An entertainment system from Linn can transform every area on board your vessel, with a superior sound that is simply totally involving.

All Linn products and marine systems are precision engineered to the highest standard. Compact, lightweight, cool-running and energy efficient, but never compromising on audio quality, they can be specified to suit any type of vessel, from an ocean-liner to a racing yacht.

Linn's advice to clients has always been the same; 'Look and listen, and compare before you buy'. Ideally, see and hear what the very best system can do before you make an informed choice.

Some people think that addressing the fundamental need for entertainment at sea is a luxury. We call it life\*.

**with unsurpassed sound.**

## 5 LEVELS OF MULTI-ZONE PERFORMANCE

Linn components offer seamless control integration with other automated systems and can be custom-designed and built into furniture and fittings. The individual design of your Linn system will depend entirely upon your needs, and will be tailored specifically to suit your vessel. Regardless of what level of performance is selected, the solution is guaranteed to deliver superior, pitch accurate performance at sea.

Linn systems can be categorised in five performance levels:

**Bronze** A simple stand-alone stereo system providing pitch accurate music for a single zone, can combine a CD player and AM/FM radio.

**Silver** For CD music, AM/FM radio and DVD movies in up to four or five connected zones. A high quality, expandable 5.1 channel surround sound and cinema system that you can extend to cover other accommodation as required.

**Gold** Powerful high performance, total entertainment serving every suite and cabin throughout a vessel. The KNEKT system offers sound distribution and keypad control for multi-channel music and movies and unrivalled ease of use. With superb sound and picture quality, it can enable up to 16 sources to be enjoyed in as many as 128 zones.

**Platinum** A unique complete system configured to provide music and cinema for multiple zones to the most advanced control and highest performance standards. Includes individual styling elements and special finishes on visible components, and bespoke engineering and software for personalised performance and user interfaces.

**Diamond** Tailored perfectly to fulfil a dream. A genuine, bespoke one-off original system. Major components are designed and made by Linn specifically to suit a particular vessel, for an innovative owner for whom every project is another bold step in a life-long journey in pursuit of perfection and personal fulfilment.

## Superyacht Zone examples

### Diamond Level (Not shown above)

- The ultimate entertainment system.
- Bespoke products and one-off reference level solutions.
- Let your imagination reach new limits and Linn will exceed your expectations.

### Platinum (Sky Lounge/Central AV Distribution Station)

- Simply exceptional entertainment solutions for you and your guests.
- Reference level products and customised system design.
- Sources in the central AV station can be distributed to all suites, cabins and secondary areas.
- The quality of equipment installed here has a direct effect on the overall system.
- This allows valuable cabin space to be utilised in other ways.
- A distributed platinum system will enhance all aspects of life on board your yacht.

### Gold (VIP Suite)

- High performance for individual suites.
- System designed to maximise performance and flexibility of cabins.
- This solution is perfectly suited to private relaxation.

### Silver (Captain's Cabin)

- Entry level of Linn quality for the smaller cabins.
- A compact, lightweight and powerful package.
- Suited to any area where space is at a premium and quality is still a factor.

### Bronze (Wheelhouse)

- Linn quality audio playback.
- Designed for areas where discreet background entertainment is required.
- Cost-effective way of ensuring continuity of audio throughout.
